

Bergen County Clean Communities Program Offerings

Pre-K to K Programming:

Alexandra's Clean Up (Ages: 3-4 yrs.) 30 minutes

What is litter and how does it affect humans, animals, and the environment? We'll discuss all aspects of litter and what we all can do to help keep our environment safe and clean.

Aluman the Can (Ages: 4-5 yrs.) 30 minutes

What is recycling and how is it different from throwing out garbage? This program defines the categories of recyclables and the importance of preserving our natural resources. We follow Aluman the Can from being discarded to being recycled into a new can.

Recycle Rex (Ages 5-6 yrs.) 30 minutes

Is recycling the same as trash? We discuss items that can be recycled and learn the importance of reusing vs. throwing out. Learn how bulky product packaging adds to our garbage crisis and ways to eliminate excessive waste.

Mid Elementary to Adult Programming:

"Can It" for a Greener Planet—(45 minutes to an Hour)

How long does it take litter to decompose and how does it affect our wildlife? In this program we will learn the ins and outs of litter, its effect on our environment, and what we can do to help. We will discuss the challenges of recycling and learn about the Great Pacific Garbage Patch and our efforts to solve the problem.

Where Does our Garbage Go?—(45 minutes to an Hour)

Have you ever wondered what is a landfill and how does it work? Last year the U.S. produced 268 million tons of garbage making the US one of the leading garbage producing countries. Learn about what a landfill is, how it is managed, and what you can do to help with our garbage crisis. We will also delve into the adverse effects litter has on the environment and explore new recycling restrictions.

Educational Program Selections

All educational programs are four hours in duration.

THE GIVING TREE

Grades: K-1

Trees give us shade and food and provide us with oxygen to breathe. Students will learn how to identify a handful of local trees by their leaves. They will take home a leaf rubbing in addition to a journal that will help them to learn about the parts of a tree and how valuable trees are to our planet.

NGSS: K-LS1-1, K-LS1.C, K-ESS2-2, K-ESS2.E, K-ESS3-3, K-ESS3.A, K-ESS3.C, 1-LS1-1, 1-LS1.A, 1-LS3-1, 1-LS3.B.

NJCCCS: MP.2, K.MD.A.2, W.K.7, SL.K.3, SL.K.5, W.1.8.

BUSY BEES

Grades: K-3

Peek into the world of bees and learn how they make their honey. Students will build their own honeycomb, learn about pollination, and create their own busy bee to take home.

NGSS: K-ESS2, K-ESS3, K-LS1-1, 1-LS1-1, 1-LS3, 2-LS2, 2-LS4, K-2-ETS1-2, 3-LS2, 3-LS3.

Presentation Selections

Presentations are 45 minutes followed by Q&A

BERGEN BITES BACK

Learn about the ticks and mosquitoes that invade our area each year, some of which carry arboviruses. This lecture will provide audiences with the tools that they need to prevent infestations and protect themselves against these vectors of disease. The old wives tales regarding tick removal and disease spread will also be addressed. A tick activity is included in this presentation and the globe mosquito and the globe tick programs will be introduced.

POLLINATOR GARDEN

Pollinator gardens are a great way to bring communities together, improve mental health, and contribute to making our planet healthier. Our educators will visit your facility to talk about the importance of pollinators. A brief presentation followed by hands-on activities will conclude with participants learning how to plant a pollinator garden using indigenous species of plants and flowers.

DON'T BE FED LEAD

Childhood lead poisoning is a preventable and detectable issue. An educator from the County will be happy to come to your facility and discuss the potential sources of lead in our homes and environment. We will provide participants with information that will serve to protect themselves and their families against the dangers of lead poisoning.

MOON 2024

Earth's Moon is critical to life on earth and has been a source of wonder and awe for generations. This lecture will illuminate the role that earth's moon plays in the dynamic processes of the earth, such as the tides, and reviews humanity's efforts to research our satellite. The Artemis mission scheduled to land on the Moon in 2024 will be discussed.
